

The 1st Meeting of India-Japan EV (Electrical Vehicle) Study Society

August 22, 2013, 246 Hole, Japan University of Economics, Grad school (Shibuya)

The society provides the opportunity to create new study projects through the technical exchange between Indian and Japanese researchers, private company members, government members and NPO members using the accumulated know-how and experiences of the society members.

At the 1st Meeting, Prof. Hirano of Kanagawa Institute of Technology presented “Outlook of global EV market and technology”; a president of Japanese EV venture told his activities; and Indian participant expressed his expectation to the society.
