

TeFFA Workshop on Advanced Electric Power Technology

April 22, 2015, Crowne Plaza Hotel, Beijing

Opening ceremony of Zhuhai Science Park was held in Beijing with more than fifty attendants from governments and industries.

TeFFA took an opportunity to provide a workshop on electric power technology based on the advanced Japanese R&D, in which Chinese participants have strong interest.

Advanced technologies on magnetic energy recovery switch (MERS), power electronics, fuel cell, fiber-sensor, railway maintenance, etc., were presented in the workshop.
