

**The 1<sup>st</sup> Academia-Industry Collaborative Meeting with Dr. Michael Nobel in Osaka**  
- Solar Energy Utilization in Asia and International Collaboration between Japan & India –

Date: March 16, 2016

Venue: Research Center for Artificial Photosynthesis (ReCAP), Osaka City University

Osaka City University created the Research Center for Artificial Photosynthesis (ReCAP) in 2013 and has since been promoting research and development of cutting-edge technologies in the field of biology and sustainability. The center invited Dr. Nobel to join as distinguished professor and opened the Michael Nobel Laboratory in 2015 in order to extend efforts to deliver its information and achievements to the world.

TeFFA and Michael Nobel Lab plan a Japan-India collaborative project, the Fukushima-Jabalpur Project, as the first one, which assists reconstruction projects in Fukushima, and new energy projects in Jabalpur, India.
